
What Is The Use Of Dll In Vb.net

```
Module1 (Declarations)
Imports System.IO
Imports System.Runtime.InteropServices
'Imports System.Runtime.InteropServices.DllImportAttribute

Module Module1
    <DllImport("ishan.dll")> _
    Public Function add(ByVal t1 As Integer, ByVal t2 As Integer) As Integer

    End Function

    Sub Main()
        ' Call the MessageBox function using platform invoke.
        MsgBox(add(5, 9))
    End Sub
End Module
```
